The vascular surgery team at Stony Brook Medicine is committed to providing you with outstanding care. Patient education is an extremely important part of your care, before and after surgery. By becoming an educated and active member of your healthcare team, you will have an integral role in your treatment and recovery.

Now that you and your physician have decided that you need surgery, you may have some questions and concerns. This binder will help answer your questions, as well as provide general information about your condition and treatment. Knowing what to expect can help make your hospital stay more pleasant and help speed your recovery.

You are encouraged to bring this binder with you to all appointments with your surgeon as well as to your preoperative appointment and on the day of surgery.

If you have additional questions, please do not hesitate to discuss them with your surgeon or another member of your healthcare team. We look forward to providing you with the best possible care.
