

Expert Treatment for Vascular Disorders

Stony Brook Vascular Center

Aortic Center | Center for Vein Care | Hemodialysis Access Center | Limb Preservation Center

Our Team of Vascular Surgeons (L to R) Angela Kokkosis, MD; George Koullias, MD, PhD; Apostolos Tassiopoulos, MD; Lucyna Price, MD; David Landau, MD; Nicos Labropoulos, PhD

"We pride ourselves in not only delivering outcomes that are among the best in the nation, but in treating each patient with a thorough individualized treatment plan to control risk factors, prevent emergencies and ultimately save lives."

—Apostolos K. Tassiopoulos, MD, Chair, Department of Surgery and Chief, Vascular and Endovascular Surgery

Stony Brook Vascular Center offers diagnosis and treatment of all types of vascular disorders, including:

- Peripheral arterial disease
- Aortic aneurysms and dissections
- Carotid artery disease
- Hemodialysis access
- Vein disease
- Vascular malformations

Our physicians, all board certified, are experts in:

- Treatment of complex aortic aneurysms and dissections with advanced endovascular and open techniques
- Management of pelvic congestion syndrome
- Treatment of peripheral artery disease
- Creation and management of hemodialysis access
- Treatment of varicose veins

Many treatments can be performed conveniently on an outpatient basis, helping patients quickly return to their everyday activities.

For consultations/appointments with our vascular specialists, call (631) 638-1670.

Urgent/same-day in-office appointments are available, as well as telehealth visits.
