

## WHAT ARE EXOSOMES

Exosomes are nano-sized, bioactive messengers that cells use to communicate with each other.

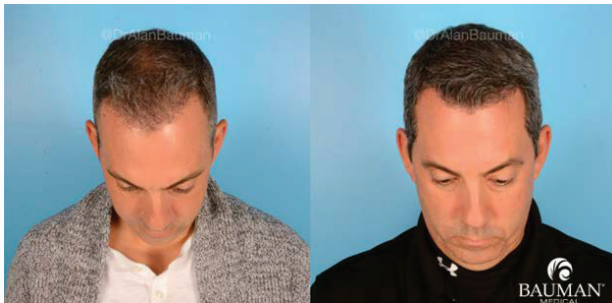

Exosomes from stem cells maintain a healthy physiological environment by introducing much needed young and vibrant proteins to the extracellular matrix and neighboring cells.

## JUVEXO FOR HAIRCARE

By combining the delivery power of exosomes with growth factors specifically formulated for hair care, JuveXO H effectively targets dull, thin, brittle, and dry looking hair.

Patients have experienced fuller appearance of hair, visibly hydrated hair and scalp, and reinvigorated confidence. **JuveXO H** puts the **H** in luxurious haircare.

## BEFORE AND AFTER

# JuveXO<sup>H</sup>

REJUVENATE. NATURALLY.

## INTENDED USE OF JUVEXO H

- + Scientifically designed for visibly stronger, thicker, and healthier hair
- + May make hair appear more vibrant
- + May improve appearance of scalp
- + Serum product intended for topical use
- + Not approved for use as a drug

Contact us to incorporate JuveXO H into your standard practices.

REVOLUTIONIZING HAIRCARE WITH THE POWER OF EXOSOMES

# JuveXO<sup>H</sup>

**JuveXO H** is a high quality MSC-derived secretome produced through a patent pending technology that enables control of the factors released by the stem cells [3].

**JuveXO H** has been scientifically formulated to contain optimal amounts of amino acids, proteins, growth factors, High Molecular Weight Hyaluronic Acid, Elastin, Types I and III Collagen, and proprietary recombinant factors - making **JuveXO H** ideal for topical use on hair and scalp.

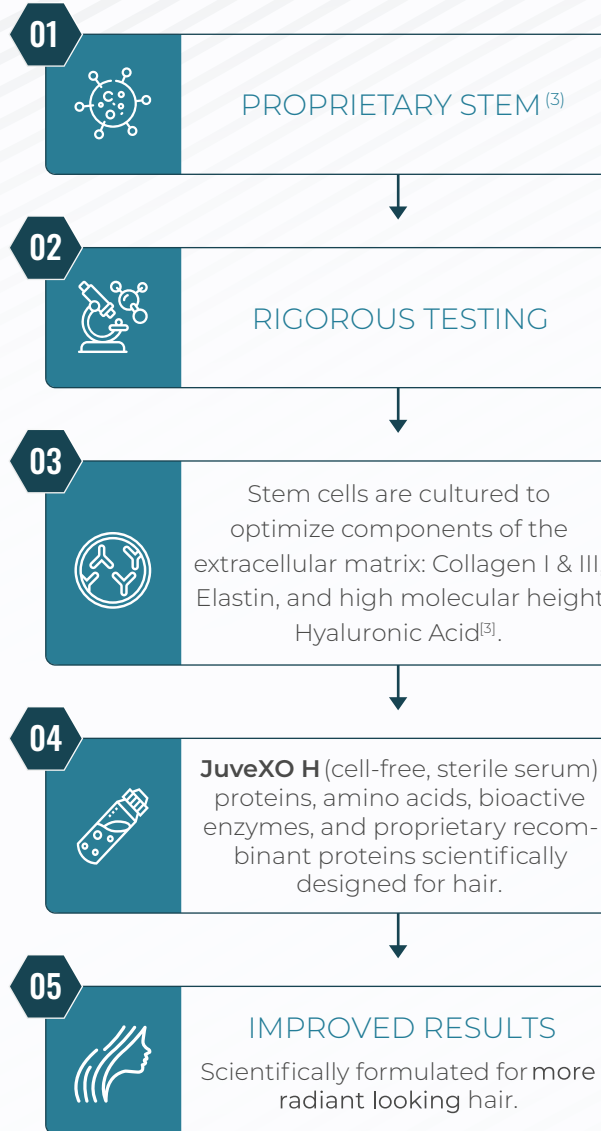

JuveXO<sup>H</sup>  
ABUNDANT IN  
NATURALLY  
OCCURRING

- Exosomes
- Proprietary Recombinant Proteins
- Growth Factors
- Collagen Type I & III
- Hyaluronic acid

**JuveXO H** has been specifically designed for hair use only.
